

# Implementation of the strategy gives results, the comparable operating profit increased

## Juha Hammarén, acting CEO

” During the second quarter of the year, the comparable operating profit increased by 10 % from the same period during last year to EUR 18.5 million. Lower expenses and good growth for net commission income in Personal & Corporate Banking as well as in Wealth Management contributed to the positive development. We introduced new products, customer concepts and several new initiatives for digitalisation which will lead to a smoother customer experiences and better customer service. The transformation of Aktia proceeded well with several positive changes which will benefit our customers even more.”

## April - June 2018:

- Total operating income increased to EUR 55.8 (54.2) million. The net commission income increased to EUR 26.2 (24.6) million. The net interest income increased to EUR 23.5 (22.9) million, of which the net interest income from borrowing and lending was EUR 17.4 (17.8) million and the interest income from Aktia’s TLTRO refinancing program was EUR 2.6 million. The interest income from the liquidity portfolio and unwound interest rate hedges decreased by EUR 2.2. million. Net income from life insurance was EUR 5.0 (5.8) million and was affected negatively by unrealised value changes in the investment portfolio.
- The total operating expenses decreased by 4 % to EUR 38.3 (39.7) million. Operating expenses excluding items affecting comparability were EUR 38.0 (37.3) million.
- The operating profit increased to EUR 18.2 (14.4) million. The comparable operating profit increased to EUR 18.5 (16.9) million.
- Outlook 2018 (unchanged): **The comparable operating profit for 2018 is expected to be somewhat higher than the comparable operating profit for 2017** (see page 18).

## Key figures

## Financial calendar

**Interim report January - September 2018    31 October 2018**

---

The half-year report January - June 2018 is a translation of the original Swedish version "Halvårsrapport 1.1–30.6.2018". In case of discrepancies, the Swedish version shall prevail.

# CEO's comments

The economic cycle continued well in Finland during the second quarter of the year. At the same time, the concern about a trade war and the political situation in Italy has increased the risks in the global economic outlook. Additionally, the ongoing monetary political normalisation process creates a basis for further turbulence. Hence the volatility on the financial market has increased.

## A strong result despite lower net income from life insurance

Aktia's operating profit for April–June 2018 increased by 26 % from corresponding period in the previous year to EUR 18.2 million. The comparable operating profit increased by 10 % to EUR 18.5 million. A strong net commission income and continuously lower expenses contributed to the strong profit growth.

The operating profit in Personal & Corporate Banking developed well during the second quarter. Sales of our new rent corridor and rent ceiling products came to a good start due to high demand. The demand for housing loans also continued high. The renewed customer concepts and pricing in line with the new strategy resulted in higher commission income from payment services and borrowing. Compared to the first quarter, Aktia increased the number of new customers in all focus customer groups at the same time as the pace of growth in customers' business volume increased.

The net commission income in the Wealth Management segment developed strongly during the second quarter. A continued successful cooperating with Universal-Investment contributed to good fund sales. Assets under management continued increasing to EUR 10,672 (9,679) million. Despite the good growth the result for Wealth Management decreased due to lower net income from life insurance which decreased due to unrealised value changes in the investment portfolio according to IFRS 9.

In May, Aktia refinanced the covered bond that matured in June. The demand for the new five-year EUR 500 million covered bond was high. The market showed confidence in Aktia when the issue was oversubscribed 2.5 times over and could be carried out to favourable terms.

We continued creating a more cost efficient organisational structure and more efficient work processes. The work led to decreased total operating expenses for several expenditure centres, e.g. IT and personnel compared to last year.

## Digitalisation creates smoother customer service

Aktia continues to digitalise its operations to create smoother customer experiences and better customer service. Authority queries and credit decisions are automated. A new Customer Relationship Management system (CRM) has been introduced. With the help of the CRM system and a new digital marketing platform, Aktia will be able to provide existing and new customers with service in an even more systematic and efficient way. As of the autumn coming, customers will be able to manage their assets in a more flexible way with Wealth Path - a robotised advice platform. Aktia also simplifies making payment confirmations as Aktia's Code App for mobile phones is introduced. Additionally, Aktia's funds and consumer credits will be offered through various new portals in the autumn coming.

## Events after the end of the period

In accordance with Aktia's strategy to focus on wealth management and financing, Aktia decreased its holdings in Aktia Real Estate Agency through a management-buyout (MBO) in July. In the beginning of August, Aktia also stopped functioning as an insurance agent for Folksam Non-Life Insurance to increase resources and focus on Aktia's strategic focus areas.

In July, credit institution Moody's upgraded the long- and short-term deposit ratings of Aktia Bank from A3/P-2 to A1/P-1 and the long-term Senior Unsecured rating from A3 to A1. The main reasons for the upgraded rating were Aktia's improved financial development during the past two years, successful diversification of the bank's income mix by expansion of asset management operations and a strengthened balance sheet.

Helsinki, 7 August 2018

**Juha Hammarén**

Acting CEO

# Main events

## Moody's upgraded Aktia's rating

In July, credit institution Moody's upgraded the long- and short-term deposit ratings of Aktia Bank from A3/P-2 to A1/P-1 and the long-term Senior Unsecured rating from A3 to A1. The main reason for the upgraded rating was the consistent improvement in Aktia's independent financial performance during the last two years, including successful diversification of the bank's mixed income through expanding asset management operations.

## New business segments

As a part of Aktia Bank Plc's strategy that was published earlier, which focuses on wealth management and financing, the Group carried out a change in reporting. As of 1 January 2018 Aktia is reporting according to three business segments: Personal & Corporate Banking, Wealth Management and Group Functions. The Personal & Corporate Banking segment oversees Aktia's Private, Corporate and Premium customers. Wealth Management, which comprises of Asset Management, Private Banking and Life Insurance, provides service to wealthy private customers and institutional investors. Group Functions oversees Aktia's support and staff functions.

## Combining the R and A shares

Aktia Bank Plc's Annual General Meeting approved the Board of Directors' proposal that the company's R and A shares should be combined without increasing the share capital, so that after the combination the company will have only one share class. The Annual General Meeting also accepted the amended Articles of Association and the directed payment-free issue of new shares to the holders of R shares so that the owners of R shares payment-free received 3 (three) new shares against every batch of 25 R shares. All in all, 2,383,851 new shares were issued to the holders of R shares. The combination was registered on 12 April 2018. Trading with the new share together with the existing share commenced on 13 April 2018 under the ISIN code FI4000058870 and trading symbol AKTIA.

## Expanding to the international market

Aktia expanded sales of its specialist knowledge on emerging market government bonds to the international market. The new cooperation with German company Universal-Investment

GmbH, the largest independent manager in the German speaking Europe that offers placement services, continued. The company has over EUR 340 billion assets under management and offers its customer over 1,000 private label funds and mandates. Universal-Investment GmbH manages and distributes Aktia's funds through its sales organisation to institutional investors in the German speaking Europe.

## Aktia's asset management in the top of Finnish fixed income fund management again

Aktia was again chosen Best Finnish Fixed Income Manager in Morningstar's competition "Finland Awards 2018". Additionally, the fund Aktia Corporate Bond+ finished among the three best funds in the Fixed Income Funds category. Asset Management at Aktia has been in the top in Morningstar's surveys since 2013. The long-standing success is proving the outstanding expertise within Aktia. Aktia's Wealth Management has specialised in three main areas within asset management: global inflation, European corporate bonds and government bonds issued by emerging markets.

## Aktia Bank introduced a new share savings plan

To support the implementation of Aktia's new strategy, the Board of Aktia Bank Plc decided to introduce a new long-term share savings plan for the employees of the Aktia Group. The aim is to encourage Aktia's employees to invest in and hold the company's shares and with that rectify the interests and engagement of the staff and management towards value development and increased shareholder value.

## Martin Backman stepped down as Chief Executive Officer at Aktia

Aktia Bank Plc's Board of Directors and CEO Martin Backman agreed together that Martin Backman will step down from his position effective immediately. Backman was CEO for the company 6 March 2017–7 March 2018. Aktia Bank Plc's Board of Directors immediately initiated the process of appointing a new CEO. Juha Hammarén, COO and Deputy to CEO, is acting as interim CEO.

# Activity in January – June 2018

## Business environment

The financial development in Finland has continued well during the second quarter of the year. In April, production increased by 2.6 % from the same period last year and in May the corresponding number was 3.4 %.

The economic growth in Finland was balanced in the beginning of the year and was based on external demand as well as domestic investments and consumption. Export reflected a strong demand for investment products in the rest of the world. However, the outlook for export is unusually uncertain and reflects escalating trade barriers between USA and the rest of the world, particularly China.

Consumer confidence is still on a very high level reflecting strong confidence from households in both the own economy and Finland's economy.

The best financial news during 2018 have come from the labour markets. The number of employed persons has between May 2017 and May 2018 increased by 90,000 persons and the employment rate trend has increased to 71.4 % during the second quarter of 2018. The positive employment development creates better conditions for increased consumption.

The inflation is still moderate in Finland. Consumer prices increased in June by 1.2 % while the corresponding number for the Euro zone was 2 %.

The divided development on the housing market has continued. The prices for old row- and block house apartments increased by 0.8 % during May 2018 in comparison to the previous year. In the Helsinki region the prices increased by 3.5 % but in other parts of the country they decreased by 1.7 %. However, in most growth centres the price development has continued favourably. Housing associations' loans and risks associated with them have launched a debate during the spring and the summer. Households' debt through housing associations have almost tripled in 10 years but this debt is still only a small amount of the households' debt, less than 13 %.

The European Central Bank has during the second quarter reinforced its communication regarding phasing out the current purchase programmes during this year. The first interest rate hike is expected during the beginning of autumn 2019. Interest rates in the euro area have not noticeably reacted to the central bank communication and the long-term interest rates have during the

early part of the summer been pressed downwards, except Italy that has suffered from political insecurity. On the other hand, the continuing moderate inflation levels within the Euro zone imply a more moderate interest level increase policy.

The OMX Helsinki 25-index increased by approximately 6 % in January–June 2018 while the Nordic banking sector index (N Banks EUR PI) decreased by approximately 14 %. Aktia's A shares dropped by approximately 0.1 % in the same period.

## Rating

On 22 December 2017, Standard and Poor's confirmed its rating of Aktia Bank Plc's creditworthiness. The rating is A- for long-term borrowing and A2 for short-term borrowing, both with a stable outlook.

On 2 July 2018, credit institution Moody's Investors Service upgraded the long- and short-term deposit ratings of Aktia Bank from A3/P-2 to A1/P-1 and the long-term Senior Unsecured rating from A3 to A1. Baseline Credit Assessment (BCA) was upgraded to a3. Furthermore, the foreign and local currency Counterparty Risk Ratings (CRR) were upgraded to Aa3/P-1 and the long- and short-term Counterparty Risk (CR) Assessments were upgraded to Aa3(cr)/P-1(cr). The outlook on the long-term deposit and senior ratings was changed from positive to stable.

Moody's Investors Service confirmed the rating Aaa for Aktia Bank's long-term covered bonds.

	Long-term borrowing	Short-term borrowing	Outlook	Covered bonds
Moody's Investors Service	A1	P-1	stable	Aaa
Standard & Poor's	A-	A-2	stable	-

## Transition to IFRS 9

The income statement for the period is reported according to IFRS 9, while the reference period for 2017 is reported according to the previous IAS 39 standard.

The new rules for measurement and recognition had at the time of the transition no significant effect on the Group's result or financial position but caused increased volatility mainly in the net income from life-insurance.

The transition to IFRS 9 brought a new model for calculating and reporting impairments. The new model can cause increased volatility for impairments of credits and other commitments, for net income from life-insurance and for net income from financial transactions.

## Profit April – June 2018

The Group's operating profit amounted to EUR 18.2 (14.4) million. The Group's profit was EUR 14.7 (11.2) million. Operating profit excluding items affecting comparability was EUR 18.5 (16.9) million.

### ITEMS AFFECTING COMPARABILITY

(EUR million)	Apr-Jun 2018	Apr-Jun 2017
Costs for restructuring	-0.3	-2.4
<b>Total</b>	<b>-0.3</b>	<b>-2.4</b>

### Income

The Group's operating income amounted to EUR 55.8 (54.2) million.

Net interest income increased by 3 % to EUR 23.5 (22.9) million. Net interest income from borrowing and lending amounted to EUR 17.4 (17.8) million. The reference period includes interest income from unwound mortgage bank loans of EUR 1.1 million. Continued low market interest rates and thereby lower interest income from the bank's liquidity portfolio decreased the Group's net interest income by EUR 1.6 million. Interest income from the 2012 unwound interest rate hedges decreased by EUR 0.6 million. Interest income from new active interest rate hedging was EUR 0.4 (-) million. In June, the European Central Bank established

the expense for Aktia's TLTRO refinancing operations. During the period a positive impact on the net interest income for EUR 2.6 million was recognised.

Net commission income increased by 7 % to EUR 26.2 (24.6) million. Net commission income from borrowing and lending amounted to EUR 3.7 (3.5) million, which corresponds to a 5 % increase. Commission income from mutual funds, asset management and securities brokerage increased by 9 % to EUR 15.0 (13.7) million. Card and other payment service commissions increased by 20 % to EUR 6.1 (5.1) million. Commission income from real estate agency operations amounted to EUR 2.4 (2.4) million.

Net income from life insurance decreased by 14 % and amounted to EUR 5.0 (5.8) million. The actuarially calculated result has increased from last year while the net income from investment activities has decreased. The changed fair value accounting for shares and participations at the transition to IFRS 9 resulted in increased volatility in the net income from life-insurance. The value change for the period, EUR -1.3 million, is included in the net income from life-insurance while the value change for the reference period is included in the fund at fair value.

Net income from financial transactions amounted to EUR 0.7 (0.1) million. The period includes unrealised value changes for shares and participations of EUR 0.3 (-) million. Net income from hedge accounting was EUR 0.1 (0.2) million.

Other operating income amounted to EUR 0.3 (0.6) million.

### Expenses

The operating expenses decreased by 4 % and amounted to EUR 38.3 (39.7) million. Operating expenses excluding items affecting comparability were EUR 38.0 (37.3) million.

Staff costs decreased by 16 % to EUR 17.8 (21.1) million. The period includes costs for restructuring, amounting to EUR 0.3 (2.3) million.

IT expenses decreased by 20 % to EUR 6.3 (8.0) million due to lower operating costs.

Depreciations of tangible and intangible assets amounted to EUR 3.2 (1.7) million, of which depreciation for the core banking system amounted to EUR 1.5 (-) million.

Other operating expenses increased by 23 % to EUR 11.0 (9.0) million, mostly due to the EUR 1.1 million EU statutory costs for the fund for financial stability for the first half-year. Last year includes costs for restructuring, amounting to EUR 0.1 million.

Impairment of credits and other commitments amounted to EUR 0.7 (-0.1) million. During the period collection claims were sold which caused a positive impact for EUR 0.7 million.

## Profit January – June 2018

The Group's operating profit amounted to EUR 35.9 (30.8) million. The Group's profit was EUR 29.8 (24.7) million. Operating profit excluding items affecting comparability increased by 11 % to EUR 36.6 (32.8) million.

### ITEMS AFFECTING COMPARABILITY

(EUR million)	Jan-Jun 2018	Jan-Jun 2017
Dividend from Suomen Luotto-osuuskunta	-	1.1
Income from the sale of Visa Europe	-	-
Costs for restructuring	-0.7	-3.1
<b>Total</b>	<b>-0.7</b>	<b>-2.0</b>

### Income

The Group's operating income amounted to EUR 107.0 (107.3) million. Operating income excluding items affecting comparability was EUR 107.0 (106.2) million.

Net interest income decreased by 4 % to EUR 44.2 (46.2) million. Net interest income from borrowing and lending amounted to EUR 34.3 (34.9) million. The reference period includes interest income from unwound mortgage bank loans of EUR 2.0 million. Continued low market interest rates and thereby lower interest income from the bank's liquidity portfolio decreased the Group's net interest income by EUR 3.8 million. Interest income from the 2012 unwound interest rate hedges decreased by EUR 1.3 million. In June, the European Central Bank established the expense for Aktia's TLTRO refinancing operations. During the period a positive impact on the net interest income for EUR 2.6 million was recognised.

Net commission income increased by 9 % to EUR 50.1 (45.7) million. Net commission income from borrowing and lending amounted to EUR 7.0 (6.4) million, which corresponds to a 11 % increase. Commission income from mutual funds, asset management and securities brokerage increased by 14 % to EUR 29.7 (25.9) million. Card and other payment service commissions increased by 17 % to EUR 12.0 (10.2) million. Commission income from real estate agency operations decreased by 7 % to EUR 3.8 (4.1) million.

Net income from life insurance decreased by 16 % and amounted to EUR 10.8 (12.8) million. The actuarially calculated result has increased from last year while the net income from investment activities has decreased. The changed fair value accounting for shares and participations at the transition to IFRS 9 resulted in increased volatility in the net income from life-insurance. The value change for the period, EUR -2.3 million, is included in the net income from life-insurance while the value change for the reference period is included in the fund at fair value.

Net income from financial transactions was EUR 1.4 (1.4) million. The period includes unrealised value changes for shares and participations of EUR 0.3 (-) million. The reference period includes a dividend from Suomen Luotto-osuuskunta of EUR 1.1 million. Net income from hedge accounting was EUR 0.3 (-0.1) million.

Other operating income amounted to EUR 0.5 (0.9) million.

### Expenses

The operating expenses decreased by 7 % and amounted to EUR 71.8 (77.0) million. Operating expenses excluding items affecting comparability was EUR 71.1 (73.9) million.

Staff costs decreased by 12 % to EUR 34.3 (39.1) million. The period includes costs for restructuring, amounting to EUR 0.7 (3.0) million.

IT expenses decreased by 24 % to EUR 12.0 (15.7) million due to lower operating costs.

Depreciations of tangible and intangible assets amounted to EUR 6.3 (3.4) million, of which depreciation for the core banking system amounted to EUR 3.0 (-) million.

Other operating expenses were EUR 19.2 (18.9) million and includes the EUR 1.1 million EU statutory costs for the fund for financial stability for the period. The cost will be EUR 2.4 million for 2018. Last year includes costs for restructuring, amounting to EUR 0.1 million.

Impairment of credits and other commitments amounted to EUR 0.1 (-0.1) million. During the period collection claims were sold which caused a positive impact for EUR 0.7 million.

## Balance sheet and off-balance sheet commitments

The Group balance sheet total at the end of June was EUR 9,380 (9,550) million.

### Liquidity

Aktia Bank's liquidity portfolio, which consists of interest-bearing securities, was EUR 1,708 (1,816) million. The liquidity portfolio was financed with repurchase agreements to a value of EUR 118 (146) million.

To monitor liquidity risks, a so-called survival horizon is used. The survival horizon measures how long the cash flows of the liquidity reserve will last to cover the contractual outgoing cash flow from the capital market without access to new financing. On 30 June 2018 the Bank Group would survive for over 28 months in a scenario with completely closed capital markets.

In addition, the liquidity risk is followed up by the Liquidity Coverage Ratio (LCR). On 30 June 2018 the LCR was 128 (161 %). The LCR level fluctuates among other things because of the maturity structure of the covered bonds issued by the bank.

Liquidity coverage ratio (LCR)*	30 Jun 2018	31 Dec 2017
LCR %	128 %	161 %

\* LCR is calculated according to the resolution published by the EU Commission in October 2014

## Borrowing

Deposits from the public and public sector entities amounted to EUR 4,100 (4,119) million, corresponding to a market share of deposits of 3.3 (3.5) %.

In total, the value of bonds issued by the Aktia Group was EUR 2,437 (2,451) million. Of these, EUR 1,666 (1,669) million was covered bonds issued by Aktia Bank.

During the period, Aktia Bank issued a new long-term covered bond with a value of EUR 500 million and a maturity of 5 years. The issue was carried out to very favourable terms and it was oversubscribed 2.5 times over. As security for the CB issue, bonds with a value of EUR 2,507 (2,110) million were reserved at the end of June.

## Lending

Total Group lending to the public amounted to EUR 5,958 (5,839) million at the end of June, an increase of EUR 119 million.

Loans to private households accounted for EUR 4,734 (4,714) million, or 79.5 (80.7) % of the loan book.

The housing loan book totalled EUR 4,728 (4,655) million, of which the share for households was EUR 3,964 (3,971) million. Aktia's new lending to private households increased to EUR 416 (January–June 2017: 442) million. At the end of June, Aktia's market share in housing loans to households stood at 4.1 (4.2) %.

Corporate lending accounted for 10.8 (10.1) % of Aktia's loan book. Total corporate lending amounted to EUR 642 (592) million. Loans to housing companies increased by 10 %, totalling EUR 540 (491) million and making up 9.1 (8.4) % of Aktia's total loan book.

### LOAN BOOK BY SECTOR

(EUR million)	30 Jun 2018	31 Dec 2017	Δ	Share, %
Households	4,734	4,714	20	79,5 %
Corporates	642	592	50	10,8 %
Housing companies	540	491	49	9,1 %
Non-profit organisations	37	38	0	0,6 %
Public sector entities	4	4	0	0,1 %
<b>Total</b>	<b>5,958</b>	<b>5,839</b>	<b>119</b>	<b>100,0 %</b>

## Financial assets

Aktia Group's financial assets consist of the liquidity portfolio of the Bank Group and other interest-bearing investments amounting to EUR 1,708 (1,816) million, the life insurance company's investment portfolio amounting to EUR 564 (574) million and the real estate and equity holdings of the Bank Group amounting to EUR 10 (9) million.

## Technical provisions

The life insurance company's technical provisions were EUR 1,223 (1,217) million, of which EUR 815 (802) million were unit-linked. Interest-related technical provisions decreased to EUR 408 (415) million.

## Equity

Aktia Group's equity amounted to EUR 569 (598). The fund at fair value decreased to EUR 24 (52) million. EUR 24 million of the total decrease of EUR 28 million is attributable to the reclassifications in conjunction with the implementation of IFRS 9.

## Commitments

Off-balance sheet commitments, consisting of credit limits, other loan promises and bank guarantees amounted to EUR 537 (553) million.

## Managed assets

The Group's total managed assets amounted to EUR 13,022 (12,281) million.

Assets under management comprise managed and brokered mutual funds and managed capital in the subsidiaries in the Wealth Management segment. The assets presented in the table below reflect net volumes, so that AuM in multiple companies have been eliminated.

Group financial assets comprise the liquidity portfolio in the Bank Group managed by the treasury function and the life insurance company's investment portfolio.

### MANAGED ASSETS

(EUR million)	30 Jun 2018	31 Dec 2017	Δ %
Assets under management	10,672	9,679	10 %
Group financial assets	2,350	2,602	-10 %
<b>Total</b>	<b>13,022</b>	<b>12,281</b>	<b>6 %</b>

## Capital adequacy and solvency

At the end of the period, the Common Equity Tier 1 capital ratio of Aktia Bank Group (Aktia Bank Plc and all its subsidiaries except Aktia Life Insurance Ltd) was 16.3 (18.0) %. After deductions, Common Equity Tier 1 capital increased by EUR 1.5 million during the period which affected the CET1 capital ratio by 0.1 percentage points. At a total, risk-weighted assets increased by EUR 237.7 million which reduced the CET1 capital ratio by 1.9 percentage points. The change is mainly attributable to the risk weight floor of 15 % for mortgage loans which increased risk-weighted assets by EUR 168.1 million. During the period the corporate exposures have also increased.

The Bank Group applies internal risk classification (IRB) to the calculation of capital requirement for retail and equity exposures. For other exposures the standardised approach is used. A total of 57 (54) % of the Bank Group's exposures are calculated according to the IRB approach. The work on migrating internal models for exposure to corporates and credit institutions continues.

Capital adequacy, %	30 Jun 2018	31 Dec 2017
<b>Bank Group</b>		
CET1 capital ratio	16,3	18,0
T1 capital ratio	16,3	18,0
Total capital ratio	20,1	23,4
<b>Aktia Bank</b>		
CET1 capital ratio	15,9	17,9
T1 capital ratio	15,9	17,9
Total capital ratio	19,7	23,2

The total capital requirement for banking consists of a minimum requirement (so-called Pillar 1), buffer requirement based on assessment (so-called Pillar 2) and other buffer requirements. The minimum requirement for CET1 capital ratio under Pillar 1 is 4.5 % and 8 % for the total capital ratio. Pillar 2 is specific to bank and is based on the Supervisory Review and Evaluation Process, SREP. The additional requirements for capital buffers increase the capital requirements and limit the distribution of profit if the CET1 capital ratio does not meet the requirements.

The Finnish Financial Supervisory Authority has set a consolidated Pillar 2 requirement for Aktia. The requirement amounts to a total of 1.75 % and covers the concentration risk within credit risk

and structural interest rate risk. For these there are no specific capital requirements (Pillar 1) in the EU's Capital Requirements Regulation (CRR). According to the decision, the requirements shall be met with CET1 capital. The requirement entered into force on 30 June 2017.

The requirement for capital conservation buffer will increase the minimum requirement by 2.5 percentage points. The countercyclical buffer will vary between 0.0 and 2.5 percentage points and is calculated by taking the geographic distribution of exposures into account. The board of the Financial Supervisory Authority will quarterly decide the magnitude of the requirement for the countercyclical capital buffer for Finnish exposures based on analysis of macroeconomic stability. The latest decisions on the requirement (29 June 2018) placed no countercyclical capital buffer requirement on the banks for Finnish exposures. Authorities in some other countries have set requirements for a countercyclical buffer and in cases when Aktia has exposures in those countries, the Group's capital requirement is increased. This requirement also applies to certain exposures in the Bank Group's liquidity portfolio. Aktia Bank Group's requirement for a countercyclical buffer amounted to 0.05 % as per 30 June 2018, taking the geographic distribution of exposures into account.

Financial Supervisory Authority has defined Other Systemically Important Institutions (O-SIIs) in Finland and set buffer requirements for them. No O-SII buffer requirement was set for Aktia. Taking all buffer requirements into account, the minimum total capital ratio level for the Bank Group was 12.30 %, and 10.30 % for Tier 1 ratio at the end of the period.

The Finnish Financial Supervisory Authority's decision to introduce a minimum level of 15 % for the average risk weight on residential mortgage loans for credit institutions that have adopted the IRB approach entered into force on 1 January 2018. According to the decision the limit only applies to housing loans as defined in the Consumer Protection Act. At the end of the period, the average risk weight for housing loans according to the IRB approach was 10.9 %. The minimum risk weight decreased CET1 by 1.3 % percentage points.

According to the latest macro-prudential decision, the board of Financial Supervisory Authority has decided to put systemic risk buffer requirements for Finnish credit institutes into place.

### COMBINED CAPITAL REQUIREMENT

30 Jun 2018	Pillar 1		Buffer requirements				Total capital requirement
	minimum requirement	Pillar 2 requirement	Capital Conservation	Counter-cyclical	O-SII	Systemic risk	
CET1 capital	4.50	1.75	2.50	0.05	0.00	0.00	8.80
AT1 capital	1.50	0.00					1.50
Tier 2 capital	2.00	0.00					2.00
<b>Total</b>	<b>8.00</b>						<b>12.30</b>

According to the Financial Supervisory Authority, the buffer requirement aims to strengthen the credit institute's structural systemic risk tolerance. The requirement varies between the credit institutes and a 1 % systemic risk buffer has been set for Aktia Bank Plc. The systemic risk buffer is to be met with CET1 capital and enters into force on 1 July 2019.

The Aktia Group has implemented IFRS 9 as of 01 January 2018. The transition to IFRS 9 had a marginal impact on the Bank Group's capital adequacy.

Aktia Bank Group's leverage ratio was 4.6 (4.5) % based on end of quarter figures.

<b>Leverage Ratio</b> <sup>1</sup>	<b>30 Jun 2018</b>	<b>31 Dec 2017</b>
Tier 1 capital	377	375
Total exposures	8 140	8,259
<b>Leverage Ratio, %</b>	<b>4.6</b>	<b>4.5</b>

1) The leverage ratio is calculated based on end of quarter figures

The Financial Stability Board has set the minimum requirement for Aktia Bank on eligible liabilities that can be written down (MREL requirement). The requirement set is twice the minimum capital requirement, including the total buffer requirement according to the Finnish Credit Institutions Act, however, at least 8 % of the balance sheet total. The requirement will enter into force on 31 December 2018. Non-preferred senior instruments have not yet been implemented into Finnish legislation.

<b>MREL-requirement (EUR million)</b>	<b>30 Jun 2018</b>	<b>31 Dec 2017</b>
RWA based	570.3	512.1
Balance sheet based	647.1	659.4
<b>Own funds and eligible liabilities</b>		
CET1	377.0	375.5
AT1 instruments	0.0	0.0
Tier2 instruments	177.5	211.3
Other liabilities	564.0	566.1
<b>Total</b>	<b>1,118.5</b>	<b>1,152.8</b>

The life insurance company follows the Solvency II directive, in which the calculation for solvency requirements are measured at market value. According to Solvency II, the company calculates its Solvency Capital Requirement (SCR) and Minimum Capital Requirement (MCR) and identifies its available solvency capital within Solvency II. Aktia Life Insurance applies the standard formula for SCR, with consideration of the transitional measure for technical provisions in accordance with the permission granted by the Financial Supervisory Authority.

At the end of the period, SCR amounted to EUR 83.4 (85.1) million, MCR to EUR 23.7 (23.9) million and the available capital to EUR 170.7 (169.5) million. Thus, the solvency ratio was 204.7 (199.2) %. Without transitional measures SCR amounted to EUR 96.0 (98.6)

million, MCR to EUR 25.7 (26.1) million and the available capital to EUR 121.0 (116.3) million. The solvency ratio without transitional measures was 126.1 (117.9) %. The transition to IFRS 9 had no impact on the solvency of Aktia Life Insurance.

The financial conglomerate's capital adequacy ratio was 152.9 (164.5) %. The financial conglomerate's capital adequacy decreased during the period, mainly due to the risk-weight floor for the residential mortgage loans. The statutory minimum stipulated in the Act on the Supervision of Financial and Insurance Conglomerates is 100 %. The transition to IFRS 9 had no significant impact on the conglomerate's capital adequacy.

## Segment overview

Aktia Bank's operations are divided into three business segments: Personal & Corporate Banking, Wealth Management and Group Functions. Operations not a part of the business segments are reported in the Other segment.

### Personal & Corporate Banking

Personal Banking provides Aktia's private customers a wide range of financing, insurance, savings and investment products and services thorough various channels. The segment also comprises the concept Aktia Premium. Corporate Banking serves companies and organisations, from micro sized companies and associations to listed companies.

#### THE SEGMENT'S OPERATING PROFIT

<b>(EUR million)</b>	<b>Jan-Jun 2018</b>	<b>Jan-Jun 2017</b>	<b>Δ %</b>
Operating income	60.7	58.2	4 %
Operating expenses	-45.6	-48.2	-5 %
Operating profit	15.1	9.9	53 %
Comparable operating profit	15.6	11.7	33 %

The demand for housing loans is still high but hard competition for good housing loan borrowers is putting pressure on customer margins for new housing loans. At the same time, rent corridor and rent ceiling products have been in high demand. The increase in the corporate business loan book reflects the strong demand on the market for both corporate investments and property financing, even here our customer margins were pressed. Net interest income from borrowing and lending has stayed on a good level due to low interest rates on deposits and stable increase in lending. Taking the segment's income of EUR 1.0 million from phasing out of Aktia Real Estate Mortgage Bank last year into account, the net interest income from borrowing and lending has increased by EUR 0.6 million. Impairments of credits and other commitments remained low.

The renewed customer concepts in line with the new strategy and price adjustments resulted in higher commission income from payment services and borrowing.

During the second quarter the development of the product selection and improving the customer experience continued. In May, the new version of the Mobile bank reached the customers and with that e.g. a quicker and easier application process for Aktia's consumer credits was launched. At the same time all cards were changed to Aktia Mastercard to streamline Aktia's card selection and continue cooperation with a supplier who is a strong digital forerunner.

The operating expenses decreased due to implementation of a new model of operations and restructuring the branch network at the end of 2017.

Lending to private customers was EUR 4,639 (4,611) million. The loan book for corporate business increased to EUR 1,193 (1,111) million. The increase is attributable mainly to larger individual credit arrangements.

Private customers' savings in deposits decreased to EUR 2,530 (2,554) million while savings in funds increased to EUR 1,442 (1,416) million.

## Wealth Management

The segment comprises asset management, private banking and life insurance businesses. The segment offers wealth management and financing services to wealthy private customers and institutional investors. The segment also offers a wide selection of investment and life insurance products for distribution in Aktia's all customer segments.

### THE SEGMENT'S OPERATING PROFIT

(EUR million)	Jan-Jun 2018	Jan-Jun 2017	Δ %
Operating income	31.5	31.5	0 %
Operating expenses	-20.3	-20.3	0 %
Operating profit	11.2	11.2	0 %
Comparable operating profit	11.3	12.4	-9 %

The segment's net commission income developed strongly. Net commission income increased by 4 % for Private Banking and by 14 % for Asset Management.

Aktia Fund Management Company's fund was EUR 4.9 billion. Sales has increased during the period, but the market change has been negative.

Institutional sales have continued well despite the turbulence on the market during the first six months. Sales of mutual funds during the period amount to EUR 634 (299) million. The main part of the sales was to foreign institutions that subscribed for funds through Universal-Investment in Luxembourg which has offered EMD fund products as of 2018.

The latest fund UI-Aktia EM Local Currency Bond+ was launched 5 March 2018. Furthermore, Aktia Fund Management expanded its product range of alternative investments with Aktia Opportunistic Credit in March/April 2018 and Aktia Alternative in April 2018.

Aktia was again chosen Best Finnish Fixed Income Manager in Morningstar's competition "Finland Awards 2018". Aktia has been in the top three for six years running and has won the competition four times. Additionally, the fund Aktia Corporate Bond+ finished among the three best funds in the Fixed Income Funds category. Institutional investors highly appreciate Aktia Asset Management and the company was awarded third best asset manager for the second year running in the "External Asset Management Institutions 2018 Finland" survey by KANTAR SIFO Prospera.

The transition to IFRS 9 caused increased volatility in net income from life insurance which decreased to EUR 9.0 (11.3) million. Net income from life insurance was burdened by unrealised value changes of EUR 2.3 million for the period.

The life insurance company's technical provisions were EUR 1,223 (1,217) million, of which EUR 815 (802) million were unit-linked. Interest-related technical provisions decreased to EUR 408 (415) million. The average discount rate for the interest-linked technical provisions was 3.4 %. Technical provisions include an interest reserve of EUR 16.0 (16.0) million, which is used for hedging future interest requirements.

Taking the restructuring costs of EUR 0.1 (1.2) million into account, the segment's comparable operating expenses increased by EUR 1.0 million. The expense ratio for the life insurance business was at a good level, 76.8 (78.9) %.

Assets under management totalled EUR 10,672 (9,679) million.

(EUR million)	30 Jun 2018	31 Dec 2017	Δ %
Assets under management	10,672	9,679	10 %
of which Institutional assets	5,613	4,590	22 %

## Group functions

The Group Functions comprises the Group's treasury business and the Group's other support and staff functions. The entities oversee the Group's financing and liquidity management and assists the other business segments with sales, IT and product support and

development. The Group Functions also include monitoring and controlling risk and financial follow-up. The largest source of income is income from the Group's treasury business.

#### THE SEGMENT'S OPERATING PROFIT

(EUR million)	Jan-Jun 2018	Jan-Jun 2017	Δ %
Operating income	15.4	17.8	-14 %
Operating expenses	-6.7	-9.1	-26 %
Operating profit	8.7	8.7	-1 %
Comparable operating profit	8.9	7.7	15 %

The book value of the liquidity portfolio amounted to EUR 1,695 (1,799) million, equivalent to 28 (31) % of the lending portfolio. The interest income of the liquidity portfolio decreased to EUR 4.6 (8.4) million due to the current level of low interest rates. Despite the challenging interest rate situation, positive interest income has been retained by reinvesting.

The net interest income for the period decreased due to lower interest income of the liquidity portfolio and lower interest income from the unwound interest rate hedges. Since March 2015, Aktia participates in the European Central Bank's long-term refinancing operations (TLTRO), which has enabled Aktia to offer financing with favourable and competitive terms. In June, the European Central Bank established the expense for Aktia's TLTRO refinancing operations. During the period a positive impact on the net interest income for EUR 2.6 million was recognised.

Income from the unwound interest derivatives in 2012 decreased to EUR 6.1 (7.5) million. The income will decrease until the end of 2019. In 2017, the positive impact of the unwound interest derivatives was EUR 14.4 million. In 2018, the positive impact on net interest income will amount to approximately EUR 10.3 million and the remaining approximately EUR 2.4 million will be recognised in 2019.

Lower financing expenses mainly from senior financing is compensating for decreasing income from the liquidity portfolio and unwound interest rate hedges.

The staff expenses were somewhat lower than the previous year, mostly due to lower restructuring costs than last year.

The running IT expenses decreased, and the depreciations increased due to the implementation of the new core banking system. Other operating expenses increased due to the EUR 1.1 million EU statutory costs for the fund for financial stability for the period.

During the period, the implementation of GDPR (General Data Protection Regulation) continued. The regulation has been applied since 25 May 2018.

#### Other

The Group's other activities consist of for instance Aktia Real Estate Agency Ltd. Other activities do not constitute a reporting business segment.

Commission income from Aktia Real Estate Agency decreased to EUR 3.9 (4.2) million.

Aktia Bank Plc decreased its holdings in Aktia Real Estate Agency Ltd to 19 % in the beginning of July. The changes in the ownership structure supports the implementation of Aktia's new strategy and will have no significant impact on the Group's result and financial position. The close cooperation between Aktia Bank and the Real Estate Agency continues even after the changes in the ownership structure.

### The Group's risk exposures

Definitions and general principles for asset and risk management can be found in Aktia Bank Plc's Annual Report for 2017 ([www.aktia.com](http://www.aktia.com)), in note G2 on pages 71-84, or in Aktia Bank Plc's Capital and Risk Management Report on the Group's website [www.aktia.com](http://www.aktia.com).

#### Lending-related risks within banking business

Non-performing loans more than 90 days overdue, including claims on bankrupt companies and loans for collection, increased to EUR 45 (36) million, corresponding to 0.74 (0.61) % of the loan book. The loan book also includes off-balance sheet guarantee commitments.

Loans to households past due more than 90 days corresponded to 0.62 (0.51) % of the entire loan book and 0.78 (0.64) % of the household loan book.

Loans with payments 3–30 days overdue decreased to EUR 13 (74) million, equivalent to 0.22 (1.26) % of the loan book. Loans with payments 31-89 days overdue decreased to EUR 17 (29) million, equivalent to 0.29 (0.50) % of the loan book.

#### LOANS PAST DUE BY TIME OVERDUE

(EUR million) Days	30 Jun 2018	% of loan book	31 Dec 2017	% of loan book
3 - 30	13	0,22	74	1.26
of which households	12	0,20	56	0.96
31 - 89	17	0,29	29	0.50
of which households	14	0,23	26	0.44
90-	45	0,74	36	0.61
of which households	37	0,62	30	0.51

## Impairment of credit and other commitments

The change in the reserve for expected credit losses (ECL) in accordance with IFRS 9 resulted in impairment of credits and other commitments amounting to EUR 0.1 (-0.1) million.

Total impairment of credits amounted to 0.00 (0.00) % of total lending. The share of impairments on corporate loans in relation to corporate lending overall amounted to -0.09 (-0.32) %.

## Distribution of risk across financial assets

The Bank Group maintains a liquidity portfolio as a buffer for situations where, for some reason, borrowing from the capital markets is not possible under common conditions. Fixed-rate investments within the liquidity portfolio are also used to reduce the structural interest rate risk.

In the life insurance business, the investment portfolio covering total technical provisions is measured on an ongoing basis at market value.

Interest-rate investments expose the Group to counterparty risks. Direct interest-rate investments are rated by international credit rating agencies such as Standard & Poor's, Fitch or Moody's. This rating is primarily affected by the counterparty's country and financial position, but also by the type of instrument and its right of priority.

## The Bank Group's liquidity portfolio and other interest-bearing investments

Investments within the liquidity portfolio and other interest-bearing investments decreased during the period by EUR 108 million and amounted to EUR 1,708 (1,816) million.

### RATING DISTRIBUTION FOR BANK GROUP'S LIQUIDITY PORTFOLIO AND OTHER INTEREST-BEARING INVESTMENTS

	30 Jun 2018	31 Dec 2017
<b>(EUR million)</b>	<b>1,708</b>	<b>1,816</b>

Finnish municipalities (no rating)	11.7 %	11.6 %
No rating	6.5 %	0.6 %
<b>Total</b>	<b>100.0 %</b>	<b>100.0 %</b>

At the end of the period, there were covered bonds with a total value of EUR 18 million that did not meet the eligibility requirements for refinancing at the central bank. Two of the bonds did not meet the criteria for refinancing at the central bank because the homeland to these covered bonds is not a member of the so-called EEA or G7 countries and in addition one bond from a domestic credit institute did not meet the criteria for refinancing at the central bank because the issue lacks rating.

## Other market risks within the banking business

The banking business conducts no equity trading or investments in real estate property for yield purposes.

At the end of the period, real estate holdings amounted to EUR 0.1 (0.1) million and investments in shares necessary for the business amounted to EUR 9.7 (9.3) million.

## Investment portfolio of the life insurance company

The market value of the life insurance company's total investment portfolio amounted to EUR 564 (574) million. The life insurance company's direct real estate investments amounted to EUR 56 (55) million. The properties are located in the Helsinki region and in other growth areas in Southern Finland, and they mostly have long tenancies.

## Value changes reported through the fund at fair value

A value impairment that is not recognised in the income statement, or an increase in value that has not been realised, is reported via the fund at fair value. Taking cash flow hedging for the Group into consideration, the fund at fair value amounted to EUR 23.6 (51.5) million after deferred tax. EUR -23.9 million of the total decrease of EUR -28.0 million is attributable to the reclassifications in conjunction with the implementation of IFRS 9.

Cash flow hedging, which comprises unwound interest-rate derivative contracts that have been acquired for the purposes of hedging the banking business' net interest income, amounted to EUR -0.1 (-0.1) million.

### THE FUND AT FAIR VALUE

## Operational risks

No operational risk causing significant financial damage occurred during the period.

## Events concerning related parties

Related parties include shareholders with significant influence and key persons in management positions and close family members, as well as companies where a key person in a management position has a controlling influence. The Aktia Group's key persons are the members of the Board of Directors, the Managing Director, the Managing Director's alternate and other members of the Executive Committee.

Further information on events concerning related parties is given in notes G44 and P45 to the Financial statements 2017.

## Other events during the reporting period

In its meeting on 12 January 2018, the Board of Directors of Aktia Bank Plc decided to launch a new long-term share savings plan for Aktia's employees to support the implementation of Aktia's new strategy. The aim is to encourage Aktia's employees to invest in and hold the company's shares and with that rectify the interests and engagement of the staff and management towards value development and increased shareholder value.

In addition to the AktiaUna savings plan, approximately 60 key employees, including the CEO and the members of the Group's Executive Committee, can within the scope of the plan be offered a possibility to participate in a performance-based share savings plan. The potential incentive based on the performance-based share savings plan is based on the number of shares the key person has acquired within the share savings plan AktiaUna. This part of the programme would replace the Executive Committee's share-based incentive scheme.

Aktia Bank Plc has on 15 January 2018 divested 39,831 series A treasury shares held by the company for payment of deferred instalments for the earning periods 2013-2014, 2014-2015 and 2015-2016 and the share ownership programme to 24 key persons included in the share-based incentive scheme.

The Annual General Meeting approved the Board of Directors' proposal of combining the company's two share classes A and R without increasing the share capital, so that the company after the combination only has one share class, which is subject to public trading. The share entitles the holder to one (1) vote per share and equal rights. The Annual General Meeting also approved the amended Paragraph 3 of Articles of Association pertaining to the combination and the directed payment-free issue of a maximum of 2,384,650 new shares to the holders of R shares deviating from shareholders' pre-emptive subscription right so that the owners of R shares payment-free receive 3 (three) new shares against every batch of 25 R class shares held in the same book-entry account.

Due to the combination of A and R share classes, the Trade Register has on 12 April 2018 registered a total amount of 2,383,851 new shares issued through a directed payment-free issue to the holders of R shares. At the same time the combination of the share classes and the amended Articles of Association pertaining to the combination has been registered in the Trade Register.

On 21 May 2018, Aktia Bank Plc has divested 82,835 Aktia shares as payment of shares from the share-based incentive scheme's earning periods 2016-2017, 2017-Q122018 as well as matching shares within the scope of the company's Share Ownership Scheme 2015-2018. Furthermore, shares held by the company have been divested to members of the Board to carry out payment of 40 % of the Board member's annual remuneration in the form of Aktia shares.

In May, Aktia refinanced the covered bond that matured in June. The demand for the new five-year EUR 500 million covered bond was high. The market showed confidence in Aktia when the issue was oversubscribed over 2.5 times and could be carried out with very favourable terms with an all-time low margin.

On 29 June 2018, The Financial Supervisory Authority established an additional capital requirement for Aktia Bank Plc which is a so-called system risk buffer requirement and is 1 %. According to the decision, the requirement can only be met with CET1 capital and therefore increases the bank's CET1 capital requirement as of 1 July 2019 when the requirement enters into force. Aktia has a strong capital adequacy and can meet the additional capital requirement with good margin already. More information about capital adequacy under Capital adequacy and solvency.

## Events after the end of the period

On 2 July 2018, Moody's Investors Service upgraded Aktia Bank Plc's deposit and Senior Unsecured rating to A1. At the same time, the outlook on long-term deposit and senior ratings was changed from positive to stable.

Aktia Bank Plc decreased its holdings in Aktia Real Estate Agency Ltd to 19 % in the beginning of July. The changes in the ownership structure supports the implementation of Aktia's new strategy and will have no significant impact on the Group's result and financial position. The close cooperation between Aktia Bank and the Real Estate Agency continues even after the changes in the ownership structure.

In accordance with Aktia's new strategy, Aktia has on 6 August 2018 ended cooperation with Folksam Non-Life Insurance and has stopped brokering their insurances. Aktia continues offering service to customers in matters regarding life, inability to work and loan protection.

On 6 August 2018, the Board of Aktia Bank Plc appointed Mikko Ayub (M.Sc., MBA) as new Chief Executive Officer. Mikko Ayub is moving to Aktia from Nordea Bank where he most recently has been Executive Advisor for the Commercial and Business Banking operations and before that he was responsible for the Markets operations in Finland, Baltics and Russia. Ayub will start as CEO on 1 October 2018 and until then, Juha Hammarén continues as acting CEO.

## Staff

At the end of June 2018, the total number of full-time employees in Aktia Group stood at 868 (31 December 2017: 804). Compared to the corresponding period the previous year, the number of full-time employees has decreased by 80 (30.6.2017; 948). The average

number of full-time employees in the period was 814 (1 January - 31 December 2017; 903).

## Incentive scheme

As of 2018, Aktia Bank Plc has launched a new long-term share savings plan for Aktia's employees in order to support the implementation of Aktia's new strategy.

The share savings plan will be offered to approximately 800 Aktia employees, who will be offered an opportunity to save 2–4 % of their salaries (the members of the Group's Executive Committee up to 7 %) and regularly acquire the company's shares at a 10 % reduced price. Furthermore, the participants are motivated by granting them free matching shares against shares acquired in the share savings plan after approximately two years.

The total savings amount and thus the value of the matching shares to be paid based the savings period 2018–2019 to the participants amounts up to a maximum total of 1,800,000 euros upon the launch of the plan, corresponding to the value of 195,000 Aktia shares. This programme replaces Aktia's Personnel Fund.

Within the scope of the above mentioned AktiaUna savings plan, approximately 60 key employees, including the CEO and the members of the Group's Executive Committee, has been offered a possibility to participate in a performance-based share savings plan. This part of the programme replaces the previous Executive Committee's share-based incentive scheme.

The performance criteria of the performance period 2018–2019 are the Aktia Group's comparable operating profit and net commission income during the performance period. The value of the reward for the performance period 2018–2019 amounts up to a maximum total of 2,600,000 euros upon the launch of the plan, corresponding to the value of 280,000 Aktia shares.

For more information on the incentive scheme see [www.aktia.com](http://www.aktia.com) > Corporate Governance > Remuneration.

## Board of Directors and Executive Committee

Aktia Bank Plc's Board of Directors for the term running until the end of the next Annual General Meeting:

- Chair Lasse Svens, M.Sc. (Econ.)
- Vice chair Arja Talma, M.Sc. (Econ.), eMBA
- Christina Dahlblom, M.Sc. (Econ.)
- Stefan Damlin, M.Sc. (Econ.)
- Maria Jerhamre Engström, eMBA
- Johannes Schulman, M.Sc (Econ.)
- Catharina von Stackelberg-Hammarén, M.Sc. (Econ.)

Aktia Bank Plc's Board of Directors on 30 June 2018 was:

- Juha Hammarén, vice District Court Judge, acting CEO, Executive Vice President and COO
- Merja Sergelius, eMBA, Executive Vice President with responsibility for private customers and SMEs
- Anssi Rantala, Dr. Soc.Sc., Executive Vice President with responsibility for Aktia Asset Management, Aktia Fund Management Company and Aktia Life Insurance
- Carola Nilsson, M.Sc. (Econ.), Executive Vice President with responsibility for private banking
- Irma Gillberg-Hjelt, LL.M., Vice President; with responsibility for corporate customers
- Sam Olin, B.Sc. (Econ.), Vice President with responsibility for premium customers
- Outi Henriksson, M.Sc. (Econ.), Chief Financial Officer with responsibility for finance, treasury and investor relations
- Minna Miettinen, BBA, Chief Digital and Marketing Officer
- Juha Volotinen, M.Sc. (Econ.), Chief IT and Data Architecture officer
- Anu Tuomolin, M.Sc. (Econ.), Chief HR officer

There is also a staff representative in the Executive Committee.

Aktia Bank Plc's Board of Directors and CEO Martin Backman agreed together that Martin Backman stepped down from his position on 7 March 2018. Juha Hammarén, COO and Deputy to CEO, is acting as interim CEO.

## Decisions of Aktia Bank Plc's Annual General Meeting 2018

The Annual General Meeting of Aktia Bank Plc on 10 April 2018 adopted the consolidated financial statements of the parent company and the group, and discharged the members of the Board of Supervisors, the members of the Board of Directors, the Managing Director and his alternate from liability.

In accordance with the proposal of the Board of Directors, the Annual General Meeting decided to distribute a dividend of EUR 0.57 per share totalling approximately EUR 37.8 million for the financial period 1 January–31 December 2017.

The Annual General Meeting determined that the number of auditors shall be one, and re-elected KPMG Oy Ab as auditor with APA Marcus Tötterman as auditor-in-charge.

The Annual General Meeting approved the Board of Directors' proposal of combining the company's two share classes A and R without increasing the share capital, so that the company after the combination only has one share class, which is subject to public trading. The share entitles the holder to one (1) vote per share

and equal rights. The Annual General Meeting also approved the amended Paragraph 3 of Articles of Association pertaining to the combination and the directed payment-free issue of a maximum of 2,384,650 new shares to the holders of R shares deviating from shareholders' pre-emptive subscription right so that the owners of R shares payment-free receive 3 (three) new shares against every batch of 25 R shares held in the same book-entry account.

Due to the combination of A and R share classes, the Trade Register has on 12 April 2018 registered a total amount of 2,383,851 new shares issued through a directed payment-free issue to the holders of R shares. At the same time the combination of the share classes and the amended Articles of Association pertaining to the combination has been registered in the Trade Register.

The Annual General Meeting adopted the proposals by the Board of Directors concerning the authorisation to issue shares, the authorisation to acquire treasury shares to be used in the company's share-based incentive scheme and/or as remuneration to members of executive bodies in the company as well as the authorisation to divest treasury shares.

All proposals mentioned above are included in the Summons to the AGM published on the website [www.aktia.com](http://www.aktia.com) under About Aktia > Corporate Governance > Annual General Meeting > Annual General Meeting 2018.

## Share capital and ownership

Aktia Bank Plc's share capital amounts to EUR 163 million. In the end of June 2018, the share capital was comprising a total of 68,962,662 Aktia shares. The total amount of register holders amounted to 39,559 (30 June 2017: 43,119). 5.0 (4.3) % of the shares were in foreign ownership. The number of unregistered shares was 765,820 (767,286) or 1.1 (1.6) %.

On 30 June 2018, the Group held 121,432 (31 December 2017; 244,098) Aktia shares.

### Shares

Aktia Bank Plc's market value at the end 29 June 2018, the last trading day of the period, was EUR 565 (677) million. The closing price for the Aktia share on 29 June 2018 was EUR 8.20 (9.37). The highest price for Aktia share was EUR 9.38 (10.95) and the lowest EUR 7.90 (8.76).

The average daily turnover for Aktia share during January–June 2018 was EUR 577,331 or 66,179 shares. An average of 301 transactions per day were carried out with shares.

After the combination of R and A shares Aktia Bank Plc only has one share series which is subject to public trading and for which each share entitles to one (1) vote per share and equal rights. The combination was registered on 12 April 2018. Trading with the company's only share class and the new shares commenced on 13 April 2018 (ISIN code FI4000058870, trading symbol AKTIA).

## Outlook and risks

### Outlook for 2018 (unchanged)

The continued low interest rate environment and decreased income from previously unwound interest-rate hedges (2012) will have a negative impact on the total net interest income for 2018.

Commission income is expected to increase in 2018. Furthermore, the cost savings measures taken in 2017 are expected to affect profitability in a more favourable way than previously estimated.

Impairments of credits are expected to remain low in 2018.

**The comparable operating profit for 2018 is expected to be somewhat higher than the comparable operating profit for 2017.**

### Risks

Aktia's result is affected by many factors, of which the most important are the general economic situation, fluctuations in share prices, interest rates and exchange rates, as well as the competitive situation. The demand for banking, insurance, wealth management and real estate agency services can be changed by these factors.

Changes in interest rates, yield curves and credit margins are hard to predict and can affect Aktia's interest margins and thus profitability. Aktia is pursuing a proactive management of interest rate risks.

Any future impairments of credits in Aktia's loan book could be due to many factors, of which the most important are the general economic situation, the interest rate level, the level of unemployment and changes in house prices.

The availability of liquidity on the financial market is important for Aktia's refinancing activities. Like other banks, Aktia relies on deposits from households to service some of its liquidity needs.

The market value of Aktia's financial and other assets can change,

among other things, as a result of requirements among investors for higher returns.

Increased regulation of banking and insurance operations has led to more stringent capital and liquidity requirements for the bank. The new regulations have also resulted in increased competition for deposits, higher demands on long-term financing and higher fixed costs.

## Financial objectives up until 2022

The financial objectives stipulated by the Board of Directors in October 2017 are:

- Improve the comparable operating profit to approximately EUR 80 million (2017; EUR 59.9 million)
- Improve the comparable cost-to-income ratio to 0.61 (2017; 0.71)
- Improve Return on Equity (ROE) to 9.7 % (comparable ROE 2017; 7.9 %)
- Common Equity Tier 1 capital ratio (CET1) 1.5-3 percentage points over regulatory requirements (2017; 7.7 percentage points over minimum capital adequacy level 10.3 %)

\* Aktia has defined the alternative performance measures to be presented in the Group's financial reports in accordance with the guidelines for Alternative Performance Measures issued by the European Securities and Markets Authority (ESMA). The Alternative Performance Measures (APMs) are financial measures that have not been defined in the IFRS rules, the capital requirements regulation (CRD/CRR) or in the Solvency II framework (SII). Therefore, the APMs shall not be regarded as substitutes for financial measures in accordance with IFRS. The APMs make comparison of different periods easier and gives users of financial reports useful further information. As from the second quarter of 2017, Aktia presents a number of new APMs, from which items affecting comparability are excluded. Items affecting comparability are not associated with day-to-day business, and such items are income and expenses attributable to restructuring, divestment of operations as well as impairment of assets departing from day-to-day business. The items affecting comparability are shown in a table under the Group's income statement and comprehensive income on pages 20 and 21.

1) At the end of the period

2) Cumulative from the beginning of the year

3) Recalculated according to the number of shares after combining series A and R

Basis of calculation for the key figures are presented in Aktia Bank Plc's Annual Report 2017 on page 59.

# Notes to the half-year report

## Note 1. Basis for preparing the half-year report and important accounting principles

### Basis for preparing the half-year report

Aktia Bank Plc's consolidated financial statement is prepared in accordance with International Financial Reporting Standards (IFRS), as adopted by the EU.

The half-year report for the period 1 January – 30 June 2018 has been prepared in accordance with IAS 34 "Interim Financial Reporting". The half-year report does not contain all the information and notes required for an annual report and should therefore be read together with the Aktia Group's annual report of 31 December 2017. Figures in the tables are presented in millions of euros rounded to one decimal. Therefore the total of individual amounts may differ from the presented total.

The half-year report for the period 1 January – 30 June 2018 was approved by the Board of Directors on 7 August 2018.

Aktia Bank Plc's financial statements and interim reports are available on Aktia's website [www.aktia.com](http://www.aktia.com).

### Key accounting principles

In preparing the half-year report the Group has followed the accounting principles applicable to the annual report of 31 December 2017.

As of 1 January 2018, as a part of the previously published new strategy, Aktia has renewed the business segments. Aktia is reporting according to three business segments as of 1 January 2018, which are Personal & Corporate Banking, Wealth Management and Group Functions. Other business is reported separately but does not make a reporting business segment. The Private Banking and Institutional customers, which previously were included in the Banking Business segment, are included in the new segment Wealth Management. The Group's treasury operations and well as other support and staff functions, which previously were included in the segments Banking Business and Miscellaneous, are included in the new segment Group functions. Other business comprise mainly Aktia Real Estate Agency Ltd. The new segment Personal & Corporate Banking consists of the previous segment Banking Business, taking the above mentioned changes into account.

### The following new and amended IFRSs has taken effect as of 1 January 2018:

The standard **IFRS 9** Financial Instruments was approved by the EU in November 2016, and it replaces IAS 39 Financial Instruments: Recognition and measurement. The Aktia Group implemented IFRS 9 when the standard became mandatory on 1 January 2018. IFRS 9 introduces new requirements for classification and measurement of financial assets and liabilities. The model for risk management and the characteristics of financial instruments in respect of future cash flows have an impact on categories applied by the Group. The Group's financial assets are from 1.1.2018 classified in the categories amortised cost, fair value through other comprehensive income, and fair value through the income statement. The reporting of financial assets according to a mixed business model, where changes in fair value according to IFRS 9 are reported through other comprehensive income, corresponds to the reporting of financial assets available for sale according to the previous IAS 39 standard.

The new rules for recognition and measurement with the transition to IFRS 9 led to less reclassification from the previous category Financial assets available for sale to the categories Financial assets measured at amortised cost and Financial assets measured at fair value through the income statement. The reclassifications had no significant impact on the Group's result or financial position with the transition to IFRS 9.

Differing from the previous model concerning provisions for credit losses based on occurred events, the requirements concerning impairment in IFRS 9 are based on a model for expected credit losses. Calculation of provisions for expected credit losses comprises financial assets measured at amortised cost and financial assets measured at fair value through other comprehensive income as well as guarantees and credit commitments. The implementation of ECL (Expected Credit Loss) models in accordance with IFRS 9 marginally decreased the provisions for write-downs. The decrease had no significant impact on the Group's result or financial position with the transition to IFRS 9.

The effects of reclassification and revaluation of financial assets and new model for write-downs slightly reduced the Group's equity. The effects in the Bank Group and on capital adequacy were marginal.

The requirements for hedge accounting in accordance with IFRS 9 made the method for assessing the efficiency of hedge accounting less based on rules and more adjusted according to the Group's risk management. The Group will implement the exclusion from the rules, according to which IAS 39 may be applied to so-called portfolio hedging. Changes in hedge accounting rules have no significant impact on the Group's result or financial position.

The effect of reclassification and revaluation of financial assets and the impact on equity with the transition to IFRS 9 is presented in Changes in equity. The changes in provisions for credit losses with the implementation of ECL (Expected Credit Loss) models according to IFRS 9 is presented in note 8.

### Accounting principles in accordance with IFRS 9 as of 1 January 2018:

From 1 January 2018, Aktia is applying IFRS 9 where financial assets are reported in three valuation categories. Classification and measurement of financial assets is based on the business model on which the instrument is managed and the instrument's properties in respect of the contractual cash flows.

The Group classifies financial assets in the following categories:

- Reported at amortised cost (AC)
- Measured at fair value through other comprehensive income (FVOCI)
- Measured at fair value through the income statement (FVTPL)

The category **Financial assets reported at amortised cost** includes:

- interest-bearing securities
- loans and other receivables
- cash and balances with central banks

Financial assets are reported at amortised cost if the asset is managed according to a business model where the instrument is expected to be held until maturity in order to obtain contractual cash flows. The contractual cash flows consist only of the payment of capital and interest on the outstanding capital (SPPI). The instruments in this category are reported on entering into agreements at fair value (acquisition cost minus attributable transaction costs) and then at amortised cost. Impairments for debt instruments are based on a three-stage model for expected credit losses (ECL) and are described under the heading Impairment of financial assets. Impairments (ECL) are recognised in the income statement.

The category **Financial assets measured at fair value through other comprehensive income** includes:

- shares and participations
- interest-bearing securities

Financial assets are measured at fair value through other comprehensive income if:

- the asset is an interest-bearing security (debt instrument) managed according to a business model where the securities are held both in order to obtain contractual cash flows (only concerns the payment of capital and interest on the outstanding capital) and which may be sold if necessary
- the asset is shares and participations (equity instrument) which is not held for trading and is chosen to be classified in this category at the first recognition

The instruments in this category are reported on entering into agreements at fair value (acquisition cost minus attributable transaction costs) and then at fair value through other comprehensive income. Write-down of debt instruments (interest-bearing securities) is based on a three-stage model for expected credit losses (ECL) and are described in more detail under the heading Write-down of financial assets. The ECL is not calculated for shares and participations. Changes in value are reported on a ongoing basis in other comprehensive income with a deduction for deferred tax. Interest income, dividends and write-downs are reported in the income statement and the return of capital is reported in other comprehensive income. The counteritem to write-downs relating to the three-stage model for expected credit losses is recognised in the fund at fair value (other comprehensive income) and thus does not affect the fair value of the asset in the balance sheet. In connection with the sale of debt securities (debt instruments), the cumulative unrealised profit or loss is transferred from the fund at fair value to the income statement.

The decision to classify shares and participations in this category on the occasion of first accounting is irrevocable, which means that future sales gains and losses on such instruments are reported in other comprehensive income.

The category **Financial assets measured at fair value through the income statement** includes:

- derivative instruments
- life insurance investments providing cover for unit-linked agreements
- shares and participations
- interest-bearing securities
- loans and other receivables

Financial assets are measured at fair value through the income statement if the asset is a derivative, the asset is held for trading or is a debt instrument that does not meet the requirement for contractual cash flows. Shares and participations are

included in this category if the possibility to be classified in the category Financial assets measured at fair value through other comprehensive income at first recognition is not used. To meet the requirement for contractual cash flows, the cash flows may only comprise the payment of capital and interest on the outstanding capital (SPPI). Financial assets held for trading are assets acquired for a short time with the intent to earn revenue and where the intention is to actively trade in these instruments. If a financial asset relates to liabilities measured at fair value through the income statement, the company may, on the occasion of first accounting, irrevocably choose also to measure the asset at fair value through the income statement if this reduces or eliminates accounting imbalance. On entering into agreements, the instruments in this category are reported at fair value and then at fair value through the income statement. Transaction costs are recorded in the income statement when they occur. Interest income, dividends, changes in fair value and sales gains and losses are reported on an ongoing basis in the income statement.

**Reclassification:** In connection to acquiring a financial asset, the asset is classified according to one of the three categories of recognition. Latter reclassification of a financial asset can only be done if the business model, according to which the assets are managed, is changed. Latter reclassification can also be done if an instrument no longer meets the criteria needed for entering a certain business model. Financial liabilities are not reclassified. Reclassification of a financial asset according to the above-mentioned requirements is to be applied going forward from the reclassification day. Previously reported profits and losses (including profits and losses from write-downs) are not recalculated retroactively.

Reclassification between different valuation categories are reported as follows:

- From amortised cost to fair value through the income statement: The asset is measured at fair value and the difference between the fair value and the amortised cost is reported as profit or loss in the income statement.
- From fair value through the income statement to amortised cost: The fair value of the asset on the reclassification day is its new acquisition value. An expected credit loss is reported on the reclassification day according to the rules of the new valuation category and an effective interest rate for the instrument is stipulated.
- From amortised cost to fair value through other comprehensive income: The asset is measured at fair value and the difference between the fair value and the amortised cost is reported as profit or loss in other comprehensive income. The expected credit loss does not change due to reclassification.

- From fair value through other comprehensive income to amortised cost: The fair value of the asset on the reclassification day is its new acquisition value. The cumulative profits and losses which previously were recognised in other comprehensive income is moved from equity and adjusts the book value of the asset. This means that the asset is reported as if it always had been reported at amortised cost. The expected credit loss does not change due to reclassification.
- From fair value through the income statement to fair value through other comprehensive income: The asset is still measured at fair value. From the reclassification day the changes in fair value are recognised through other comprehensive income and an expected credit loss is on the reclassification day to be reported according to the rules of the new valuation category.
- From fair value through other comprehensive income to fair value through the income statement: The asset is still measured at fair value. As of the reclassification day cumulative profits and losses are re-entered, as previously reported in other comprehensive income, from equity to income statement.

**Hedge accounting:** In accordance with the Aktia Group's hedge accounting policy, hedge accounting is defined either as fair value hedging or cash flow hedging. Documentation and establishment of the hedging relationship between the hedging instrument, the hedged item, the risk management aim and the strategy, occur when hedging is entered into. When a high negative correlation exists between the hedging instrument's change in value and the change in value of the hedged item or cash flow, the hedging is considered to be effective. The effectiveness of the hedging relationship is continually assessed and evaluated through prospective efficiency testing and measured on a cumulative basis. If the hedging relationship between the derivatives and the hedged items is not a 100 % match, the ineffective part is reported in the income statement. Aktia applies the exception which means that the rules set out in IAS 39 are also continuously applied to so-called portfolio hedging.

**Write-down of financial assets:** The Group applies a three-stage model to calculate the expected credit losses (ECL) for the following financial assets that are not measured at fair value through the income statement:

- debt instruments (interest-bearing securities and loans and other receivables) measured at amortised cost
- debt instruments (interest-bearing securities) measured at fair value through other comprehensive income
- loan promises
- financial guarantee contracts

Expected credit loss (ECL) is not calculated for shares and participations.

Financial assets are transferred between the following three stages based on the change in the credit risk from the occasion of first accounting:

- Stage 1 12 months' ECL:
  - Expected credit losses for twelve months are calculated for non-defaulted exposures where the credit risk has not increased significantly since the occasion of first accounting. The effective interest rate is calculated on the gross book value.
- Stage 2 ECL for the remaining duration of non-defaulted exposures
  - The expected credit losses for the instrument's remaining duration are calculated for non-defaulted exposures where the credit risk has increased significantly since the occasion of first accounting. The effective interest rate is calculated on the gross book value.
- Stage 3 ECL for the remaining duration of defaulted exposures
  - Stage 3 includes exposures for which one or more events that have a significant negative impact on the future estimated cash flows has occurred. For defaulted assets in stage 3, expected credit losses for the instruments remaining duration are booked on an ongoing basis, whereas the effective interest rate is calculated on the basis of the impaired book value.

At each reporting date, an evaluation is made as to whether a **substantial increase in the credit risk** has occurred, by comparing the risk of failure at the reporting date with the situation on the occasion of first accounting. The evaluation considers all relevant and available information which can be accessed without excessive cost or effort. This includes qualitative and quantitative and financial information that describes the future. An exposure migrates through the various ECL stages when the credit quality decreases. In a similar way, the exposure migrates back from the ECL for the entire duration to ECL 12 months if the credit quality in future periods is improved and a previous assessment of a substantial increase in credit risk is revised. Exposures whose credit quality has not substantially deteriorated since the occasion of first accounting are considered a low credit risk. For such exposures, a 12 months ECL is calculated. When an asset is no longer recoverable, a confirmed credit loss is booked against the impairment allowance in the balance sheet. A confirmed credit loss is booked when all recovery actions have been completed and the final loss has been established. Any future payments are booked in the income statement as a reversal of the credit loss.

The **expected credit losses (ECL) are calculated** as an objective probability-weighted estimate of future losses. The calculation includes:

- Non-impaired or defaulted financial assets at the time of reporting. ECL is calculated as the current value of all estimated defaults over the financial asset's calculated term of maturity or during the following 12 months. The estimated defaults are the difference between the asset's contractual cash flows and the cash flows the Group expects to receive.
- impaired or defaulted financial assets at the time of reporting. ECL is calculated as the difference between the amortised cost and the current value of the financial asset's estimated future cash flows.
- loan promises granted but not used. ECL is calculated as the difference between the contractual cash flows in the event a credit is used and the cash the Group expects to receive.
- financial guarantee contracts. ECL is calculated as the difference between the expected payments and the amount the group expects to recover.

**Management discretion** is required when estimating the amount and timing of future cash flows when evaluating impairment of financial assets. When estimating these cash flows, an assessment is made of the debtor's ability to pay and the net realisable value of any securities. The estimates are based on assumptions regarding various factors that can affect the ECL calculation. The actual result may vary in relation to these assumptions, which affects future changes in provisions for impairments.

**Calculation of the expected credit losses (ECL):** The group has internally developed models for the evaluation of the creditworthiness derived from different sources with historical data. The models are used in the assessment of the risk of failure when providing loans and other financial exposures to counterparties and customers. For **credits and other receivables**, ECL is calculated on the basis of the exposure's risk parameters PD, LGD and EAD. These parameter estimates are derived from the same models used in the IRB solvency calculation, but are based on a so-called "Point-in-Time" calibration reflecting the prevailing or anticipated economic situation at the accounting horizon. For credits in Stage 1, ECL is equal to the product of the PD, LGD and EAD, i.e. 12-month ECL. For credits in Stage 2 and 3, ECL is calculated as the sum of 12-month ECL over the lifetime of the claim, adjusted for the probability that the exposure defaults during a previous period. Lifetime ECL also takes into account the contractual amortisation plan that is reflected in both the EAD and LGD estimate. Lifetime ECL for **interest-bearing securities** is calculated on the basis of the interest certificate's contractual calendar. Lifetime ECL is calculated as LGD multiplied by the sum of all expected and discounted cash flows times the probability of a credit event (PD). PD is calculated separately for each security by allocating an appropriate risk curve and by taking into account the liquidity and tax effects. 12-month ECL is then calculated by scaling down the lifetime ECL with a securities-specific proportionality constant which comprises the credit risk quota during the certificate's lifetime and the credit risk in the coming year.

**Substantial increase of credit risk:** When determining whether a substantial increase in credit risk has occurred since the occasion of first accounting, the Group uses both quantitative and qualitative information and analysis. The information and analysis are based on the Group's historical data and expert assessment of the credit risk and also include financial information that describes the future.

For **credits and other receivables** an increase in credit risk is considered to have occurred:

- based on an absolute change in PD for the remaining maturity
- at the latest when a payment is over 30 days delayed or when a customer is covered by mitigating circumstances. These criteria define an absolute baseline for when an increase in credit risk has occurred
- when there are indications of other qualitative factors that have not been visible in regular quantitative analyses. In such cases the Group can use expert evaluations and relevant historical information

For **interest-bearing securities**, the increase in credit risk is evaluated according to two different criteria. The first criterion for an increase in credit risk is a significant drop in external credit rating. The second criterion is that the value development for the interest-bearing security keeps within its volatility range. Volatility is calculated according to the price development throughout the instrument's lifetime. In addition to the above-mentioned criteria, expert evaluation is used if necessary. The expert evaluation is carried out taking the Group's internal rating into consideration.

**Assessment of need of write-downs (definition of default):** In the model for calculating expected credit losses (ECL) the Group has defined default as described in the Group's credit regulations and processes when assessing the need for write-downs. Default means the counterparty's inability, regarding credits and other receivables, to according to agreed terms handle all its loan obligations towards the bank in the form of payment of capital, interest, charges and expenses.

A counterparty is considered defaulted if at least one of the following criteria is met:

- A significant loan repayment is delayed 90 days or more
- A significant loan repayment is delayed less than 90 days but at least one of the following criteria are met:
  - the bank has applied for or the counterparty has been declared bankrupt
  - the counterparty is in debt reconstruction
  - according to the bank's assessment it is unlikely that the customer fully can pay its loan obligations to the bank without the bank having to take action, e.g. liquidising possible collateral

**Interest-bearing securities** are considered defaulted if the financial position of the company, where the investment is made, meets one of the following criteria:

- The company has been declared bankrupt or is de facto insolvent and unable to make payments
- The company has entered into an agreement about business debt restructuring or has applied for protection against its creditors or is undergoing significant restructuring which affects creditors
- The company has missed a payment according to contractual cash flow and has not been corrected within 30 days

In addition to default, interest-bearing securities are checked individually for assessing the need for write-downs if the security's rate has dropped under 50 %.

**Information describing the future:** The Group has established a panel of experts which takes account of various relevant future macro-economic factors to define an objective assumption supporting the ECL calculations. The expert panel consists of the management of the risk and economy function as well as the Group's Chief Economist, amongst others. Relevant regional and sector-specific adjustments are made to capture deviations from general macro-economic scenarios. The adjustments reflect the best assumption on future macro-economic conditions which are not incorporated in the ECL calculations. Macro-economic factors taken into account include, for example, unemployment, interest rate level, inflation, residential and commercial property prices. The methodologies and scenarios for future macro-economic conditions are revised regularly.

For **credits and other receivables** (credit portfolio) the risk parameters are adjusted according to assumptions in the relevant macro scenario in calculation of lifetime ECL. The PD estimate is adjusted based on a macro economic model that takes e.g. developments of unemployment into account. If unemployment is expected to increase, the PD estimate of household credits will increase. The LGD estimate takes the assumed development of house and real estate prices into account. If the market value of the securities decreases in the scenario, this has a positive effect on the LGD estimate, given that the repayment speed does not exceed the decrease in the market value of the securities.

The ECL calculation for **interest-bearing securities** (liquidity and investment portfolio) uses directly observable market prices and therefore needs no stochastic or constructed estimates. When the models use market information in as high a degree as possible, the market's expectation of the future development is implicitly represented in the model.

**IFRS 15** Revenue from contracts with customers replaced all earlier standards and interpretations of revenue recognition. The standard was approved by the EU in October 2016, and it is

mandatory as of 1 January 2018. The Aktia Group implemented IFRS 15 when the standard became mandatory. IFRS 15 includes a comprehensive five-step model for revenue recognition. In the Aktia Group, revenue recognition is reported using the accruals convention when recognising expenses and revenue. Interests are recognised according to the effective interest rate and commissions are recognised on a pro rata basis as from the time of the contract. Income from real estate agency is recognised at the time when ownership of the object sold is transferred from the seller to the buyer. Commission income is recognised when the work to carry out a transaction is done and the transaction is completed. Changes in accounting principles for revenue recognition are not expected to have any significant impact on the Group's result or financial position.

#### The following new and amended IFRSs may affect the reporting of future transactions and business

On 13 January 2016, IASB published a new standard, IFRS 16 Leases, to supersede IAS 17 Leases. IFRS 16 eliminates the distinction between operating and finance leases for lessees,

introducing a new model instead, where assets and liabilities for all leases with lease terms exceeding 12 months shall be reported in the balance sheet. For leases where the lease term is 12 months or less, or where the value of the underlying asset is low, exemptions may be applied. For the leased asset, depreciation and interest expenses relating to the lease liability are reported separately. The requirements concerning lessor accounting remain largely unchanged from IAS 17, and the distinction between operating and finance leases is retained. In our view, the new standard will change accounting concerning leased property, which will mainly impact the balance sheet. The Group expects that the changes in the accounting rules regarding leases will not have a significant impact on the Group's result or financial position. The standard was approved by the EU in October 2017. The Aktia Group implements IFRS 16 when the standard becomes mandatory as of 1 January 2019.

The Group does not expect other new or revised IFRSs or interpretations from IFRIC (International Financial Reporting Interpretations Committee) to have an impact on the Group's future result, financial position or explanatory notes.

#### CLASSIFICATION OF FINANCIAL ASSETS AND LIABILITIES UNDER IFRS 9 AS OF 1 JANUARY 2018

Classification of financial instruments 1 January 2018	Classification under IAS39	Classification under IFRS9	Carrying amount IAS39	Reclassification	Remeasurement *	Carrying amount IFRS 9	Equity impact as at 1 Jan 2018
Cash and balances with central banks	Loans and other receivables	Amortised cost	282,477	-	-	282,477	-
Interest-bearing securities		Amortised cost		92,852	-23,627	69,225	-18,902
Interest-bearing securities	Held for sale	Fair value through other comprehensive income	1,797,199	-98,416	-	1,698,782	-

Lending to the public and public sector entities	Loans and other receivables	Amortised cost	5,838,764	-	1,016	5,839,780	813
Investments for unit-linked insurances	Fair value through the income statement	Fair value through the income statement	802,575	-	-	802,575	-
<b>Total</b>			<b>9,350,929</b>	<b>-</b>	<b>-22,611</b>	<b>9,328,318</b>	<b>-17,967</b>

\* Includes value change and change in provisions for credit loss in in connection with the transition to IFRS 9. The change in provisions for credit loss is presented in detail in note 8.

1) In connection with the transition to IFRS 9, the periodised overvalue of reclassified interest-bearing securities held until maturity under IAS 39 is transferred from the fund at fair value to retained earnings. Simultaneously, the deferred tax liabilities of the overvaluation disappear and its effect is reported under Equity impacts as of 1 Jan 2018 in the table above.

#### THE BANK GROUP'S RISK-WEIGHTED AMOUNT FOR OPERATIONAL RISKS

(EUR million)

Risk-weighted amount for operational risks	2015 <sup>1</sup>	2016	2017	Jun 2018	Mar 2018	Dec 2017	Sep 2017	Jun 2017
Gross income	187.7	183.3	188.9					
- average 3 years			186.6					
<b>Capital requirement for operational risk</b>				<b>28.0</b>	<b>28.0</b>	<b>28.0</b>	<b>27.9</b>	<b>27.9</b>
<b>Risk-weighted amount</b>				<b>349.9</b>	<b>349.9</b>	<b>349.9</b>	<b>348.7</b>	<b>348.7</b>

\* Recalculated after acquisition of Aktia Finance Ltd.

The capital requirement for operational risk is 15 % of average gross income for the last three years. The risk-weighted amount for operational risks is calculated by dividing the capital requirement by 8 %.

Derivative instruments	70.6	70.6	84.0	84.0
<b>Total</b>	<b>9,180.9</b>	<b>9,154.7</b>	<b>9,350.9</b>	<b>9,282.1</b>
<b>Financial liabilities</b>				
Deposits	4,724.2	4,716.2	4,813.0	4,803.5
Derivative instruments	30.5	30.5	33.6	33.6
Debt securities issued	2,436.9	2,449.1	2,450.7	2,465.7
Subordinated liabilities	223.3	226.0	235.2	238.2
Other liabilities to credit institutions	55.3	55.7	60.0	60.4
<b>Total</b>	<b>7,470.3</b>	<b>7,477.6</b>	<b>7,592.5</b>	<b>7,601.3</b>

In the table, the fair value and the book value of the financial assets and liabilities, are presented per balance sheet item. The fair values are determined both for agreements with fixed and variable interest rates. The fair values are calculated without accrued interest and without the effect of possible hedging derivatives attributable to the balance sheet item.

Fair values on investment assets are primarily determined by market prices quoted on active markets. If quoted market prices are not available, the value of the balance sheet items is mainly determined by discounting future cash flows using market interest rates on the day the accounts were closed. In addition to the credit risk profile of current stock, costs for re-financing are considered in the discount rate when determining fair values on loans. For cash and balances with central banks, the nominal value is used as fair value.

For deposits repayable on demand, the nominal value is assumed to be equivalent to the fair value. Deposits with maturity are determined by discounting future cash flows at market interest rates on the day the accounts were closed. The fair value of issued debts is mainly determined based on quotes on the market. In the discount rate for unquoted issued debts and subordinated liabilities, a marginal corresponding the seniority of the instrument is applied.

Derivatives are measured at fair value corresponding to quotes on the market.

**MEASUREMENT OF FINANCIAL ASSETS AT FAIR VALUE**

**Level 1** consists of financial instruments that are valued using prices listed on an active market. In an active market transactions occur with sufficient volume and frequency to provide pricing information on an ongoing basis. This category includes listed bonds and other securities, listed equity instruments and derivatives, for which tradable price quotes exist.

**Level 2** consists of financial instruments that do not have directly accessible listed prices from an effective market. The fair value has been determined by using valuation techniques, which are based on assumptions supported by observable market prices. Such market information may include listed interest rates, for example, or prices for closely related instruments. This category includes the majority of OTC derivative instruments, as well as many other instruments that are not traded on an active market. In addition, the Bank makes an independent valuation adjustment to the market value of the outstanding OTC derivatives for the counterparty credit risk as well as for the own credit risk.

**Level 3** consists of financial instruments for which the fair value cannot be obtained directly from quoted market prices or indirectly by using valuation techniques or models supported by observable market prices. This category mainly includes unlisted equity instruments and funds, and other unlisted funds and securities where there currently are no fixed prices.

**Transfers between levels 1 and 2**

Transfers between levels may occur when there are indications of changes in market conditions, e.g. when instruments cease to be actively traded. During the period there has been no transfers between level 1 and level 2. The increase in level 2 is due to an increase in business volumes, mainly relating to domestic municipal bonds and commercial papers.

Aktia Group's Risk control has the responsibility for classifying financial instrument into levels 1, 2 and 3. The valuation process, which is made on an ongoing basis, is the same for financial instruments in all levels. The process determines to which level a financial instrument will be classified. In cases where internal assumptions have a material impact on fair value, the financial instrument is reported in level 3. The process also includes an evaluation based on the quality of the valuation data, if a type of financial instrument is to be transferred between levels.

**Changes within level 3**

The following table present the change from year-end regarding level 3 Financial assets rmeasured at fair value.

<b>Reconciliation of the changes for financial instruments belonging to level 3</b>	<b>Financial assets measured at fair value through income statement</b>			<b>Financial assets measured at fair value through other comprehensive income</b>			<b>Total</b>

**Sensitivity analysis for level 3 Financial instruments**

The value of financial instruments reported at fair value in level 3 includes instruments, that have been valued partly or in total, using techniques based on assumptions not supported by observable market prices.

This information shows the effect that relative uncertainty can have on the fair value of financial instruments whose valuation is dependent on non-observable parameters. The information should not be seen as predictions or as indication of future changes in fair value.

The following table shows the sensitivity of fair value in level 3 instruments in the event of market changes. Interest-bearing securities have been tested by assuming a 3 percentage points parallel shift of the interest rate level in all maturities. At the same time the market prices for shares and participations are assumed to change by 20 %. These assumptions would mean a result or valuation effect via the fund at fair value corresponding to 2.3 (2.6) % of the finance and insurance conglomerate's own funds.

## SET OFF OF FINANCIAL ASSETS AND LIABILITIES

(EUR million)	30 Jun 2018		31 Dec 2017	
	Derivatives	Reverse repurchase agreements	Derivatives	Reverse repurchase agreements
<b>Assets</b>				
Financial assets included in general agreements on set off or similar agreements	70.6	-	84.0	-
Set off amount	-	-	-	-
<b>Carrying amount recognised in the balance sheet</b>	<b>70.6</b>	<b>-</b>	<b>84.0</b>	<b>-</b>
Amount not set off but included in general agreements on set off or similar	5.5	-	5.8	-
Collateral assets	61.2	-	76.6	-
<b>Total amount of sums not set off in the balance sheet</b>	<b>66.6</b>	<b>-</b>	<b>82.4</b>	<b>-</b>
<b>Net amount</b>	<b>3.9</b>	<b>-</b>	<b>1.7</b>	<b>-</b>
<b>Liabilities</b>				
Financial liabilities included in general agreements on set off or similar agreements	30.5	118.2	33.6	146.2
Set off amount	-	-	-	-
<b>Carrying amount recognised in the balance sheet</b>	<b>30.5</b>	<b>118.2</b>	<b>33.6</b>	<b>146.2</b>
Amount not set off but included in general agreements on set off or similar	5.5	-	5.8	-
Collateral liabilities	7.7	118.6	12.3	145.9
<b>Total amount of sums not set off in the balance sheet</b>	<b>13.2</b>	<b>118.6</b>	<b>18.1</b>	<b>145.9</b>
<b>Net amount</b>	<b>17.3</b>	<b>-0.4</b>	<b>15.5</b>	<b>0.3</b>

The table shows financial assets and liabilities that are not set off in the balance sheet, but have potential rights associated with enforceable master set-off arrangements or similar arrangements, such as ISDA Master Agreements, together with related collateral. The net amount shows the exposure in normal business as well as in the event of default or insolvency.

## Note 10. Specification of Aktia Group's funding structure

# Report on review of the half-year report of Aktia Bank plc as of and for the six months period ending June 30, 2018

## To the Board of Directors of Aktia Bank plc

### Introduction

We have reviewed the balance sheet as of June 30, 2018 and the related income statement, statement of other comprehensive income, statement of changes in equity capital and cash flow statement of Aktia Bank plc Group for the six-month period then ended, as well as other explanatory notes to the consolidated financial statements. The Board of Directors and the Managing Director are responsible for the preparation and fair presentation of this interim financial information in accordance with IAS 34 Interim Financial Reporting and other Finnish rules and regulations governing the preparation of interim reports. We will express our conclusion on the interim report based on our review.

### Scope of review

We conducted our review in accordance with the Standard on Review Engagements 2410, Review of Interim Financial Information Performed by the Independent Auditor of the Entity. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and

accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with the standards on auditing and other generally accepted auditing practices and consequently does not enable us to obtain a level of assurance that would make us aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

### Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the interim report, in all material respects, is not prepared in accordance with IAS 34 Interim Financial Reporting and other applicable rules and regulations governing interim financial reporting preparation in Finland.
